TriviaPay

A blockchain-powered student financial ecosystem built on Algorand – Pay. Save. Split.

Hackjklu 2025

FinTech & Blockchain

Every student faces 3 financial headaches – every single day.

01

Splitting Bills is Awkward

Calculating who owes what after every meal, trip, or event is messy, slow, and causes friction among friends.

02

No Simple Campus Payments

Paying for events, clubs, or peer-to-peer transactions requires multiple apps — none built for campus life.

03

Zero Savings Discipline

Students want to save for laptops, trips, or emergencies but have no structured, motivating tool to do it.

OUR SOLUTION

One App–Three Superpowers.

Campus Wallet

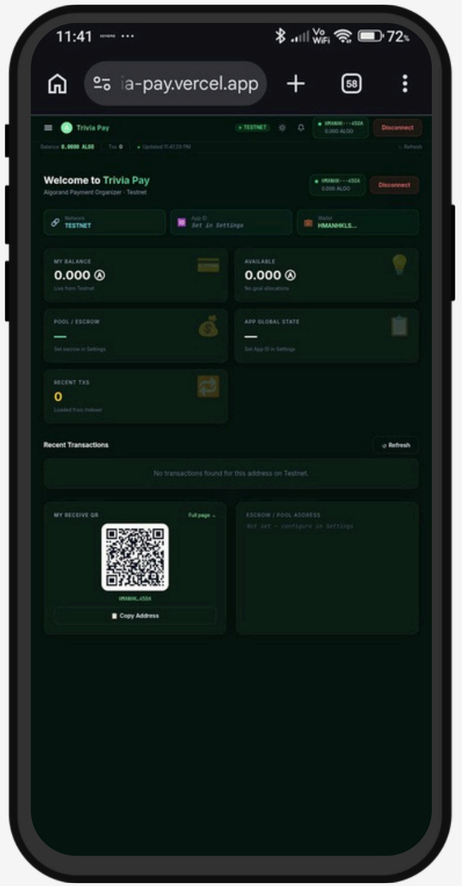
Connect Algorand wallet. Send & receive ALGO instantly. View balances and full transaction history. QR code payments.

Savings Tracker

Set savings goals with deadlines. Track deposits on-chain. Earn achievement badges. Visual progress analytics.

Split–the–Bill

Create expense groups. Auto-calculate who owes what. One-click blockchain settlement. Zero awkwardness.



HOW IT WORKS

01 Connect Wallet

Student connects Pera Wallet or WalletConnect to the app in seconds.

02 Join Campus

Join the campus community. Add friends by Algorand address or QR scan.

03 Transact

Pay, split bills, or deposit to savings goals instantly on Algorand.

04 Track & Grow

View real-time balances, transaction history, and savings milestones.

Zero Custody — User Owns Keys

BUSINESS MODEL

01

Customer Segments

College students, event organizers, campus admin, campus merchants (future).

02

Value Proposition

Blockchain-powered, zero-fee campus payments + savings + bill splitting in ONE app.

03

Channels

WhatsApp, campus social media, college events, friend referrals, QR codes.

04

Revenue Streams

Premiumanalytics,merchant fees, white-label to other colleges, Algorand grants.

05

Key Resources

Dev team, Algorand blockchain, campus community network, open-source stack.

06

Key Activities

App development, user onboarding, community building, security audits, feedback loops.

What We Built

Campus Wallet

- Algorand wallet connect (Pera/ WalletConnect).
- Live ALGO & ASA balance display.
- Send payments with QR codes.
- Full transaction history viewer.

Savings Tracker

- Create goals with deadlines & targets.
- On-chain deposit recording.
- Progress bars & visual analytics.
- Achievement badges on completion.

Split-the-Bill dApp

- Create expense groups by address.
- Auto-calculate who owes whom.
- One-click Algorand settlement.
- Real-time debt dashboard.

WHY ALGORAND?

Transaction Finality

Payments confirmed in seconds, not minutes. Perfect for real-time campus transactions.

Transaction Fee (0)

Students pay almost nothing per transaction. No barrier to adoption.

Green Blockchain (c -ve)

Algorand is carbon-negative. A sustainability story that resonates with campus culture.

Pure PoS Consensus

No mining, no energy waste. Cryptographically secure and decentralized.

Algorand Standard Assets

Create custom campus tokens or stablecoins for savings goals with native ASA support.

AlgoSDK JavaScript

Beginner-friendly SDK with rich documentation – perfect for student developers.

THE TEAM

Swastik Pandey

UI & UX React frontend, API integration, wallet connect implementation

Kartikeyan Dubey

Blockchain Developer
Algorand SDK, smart contracts, ASA creation & transaction handling
